

AZ-400.6

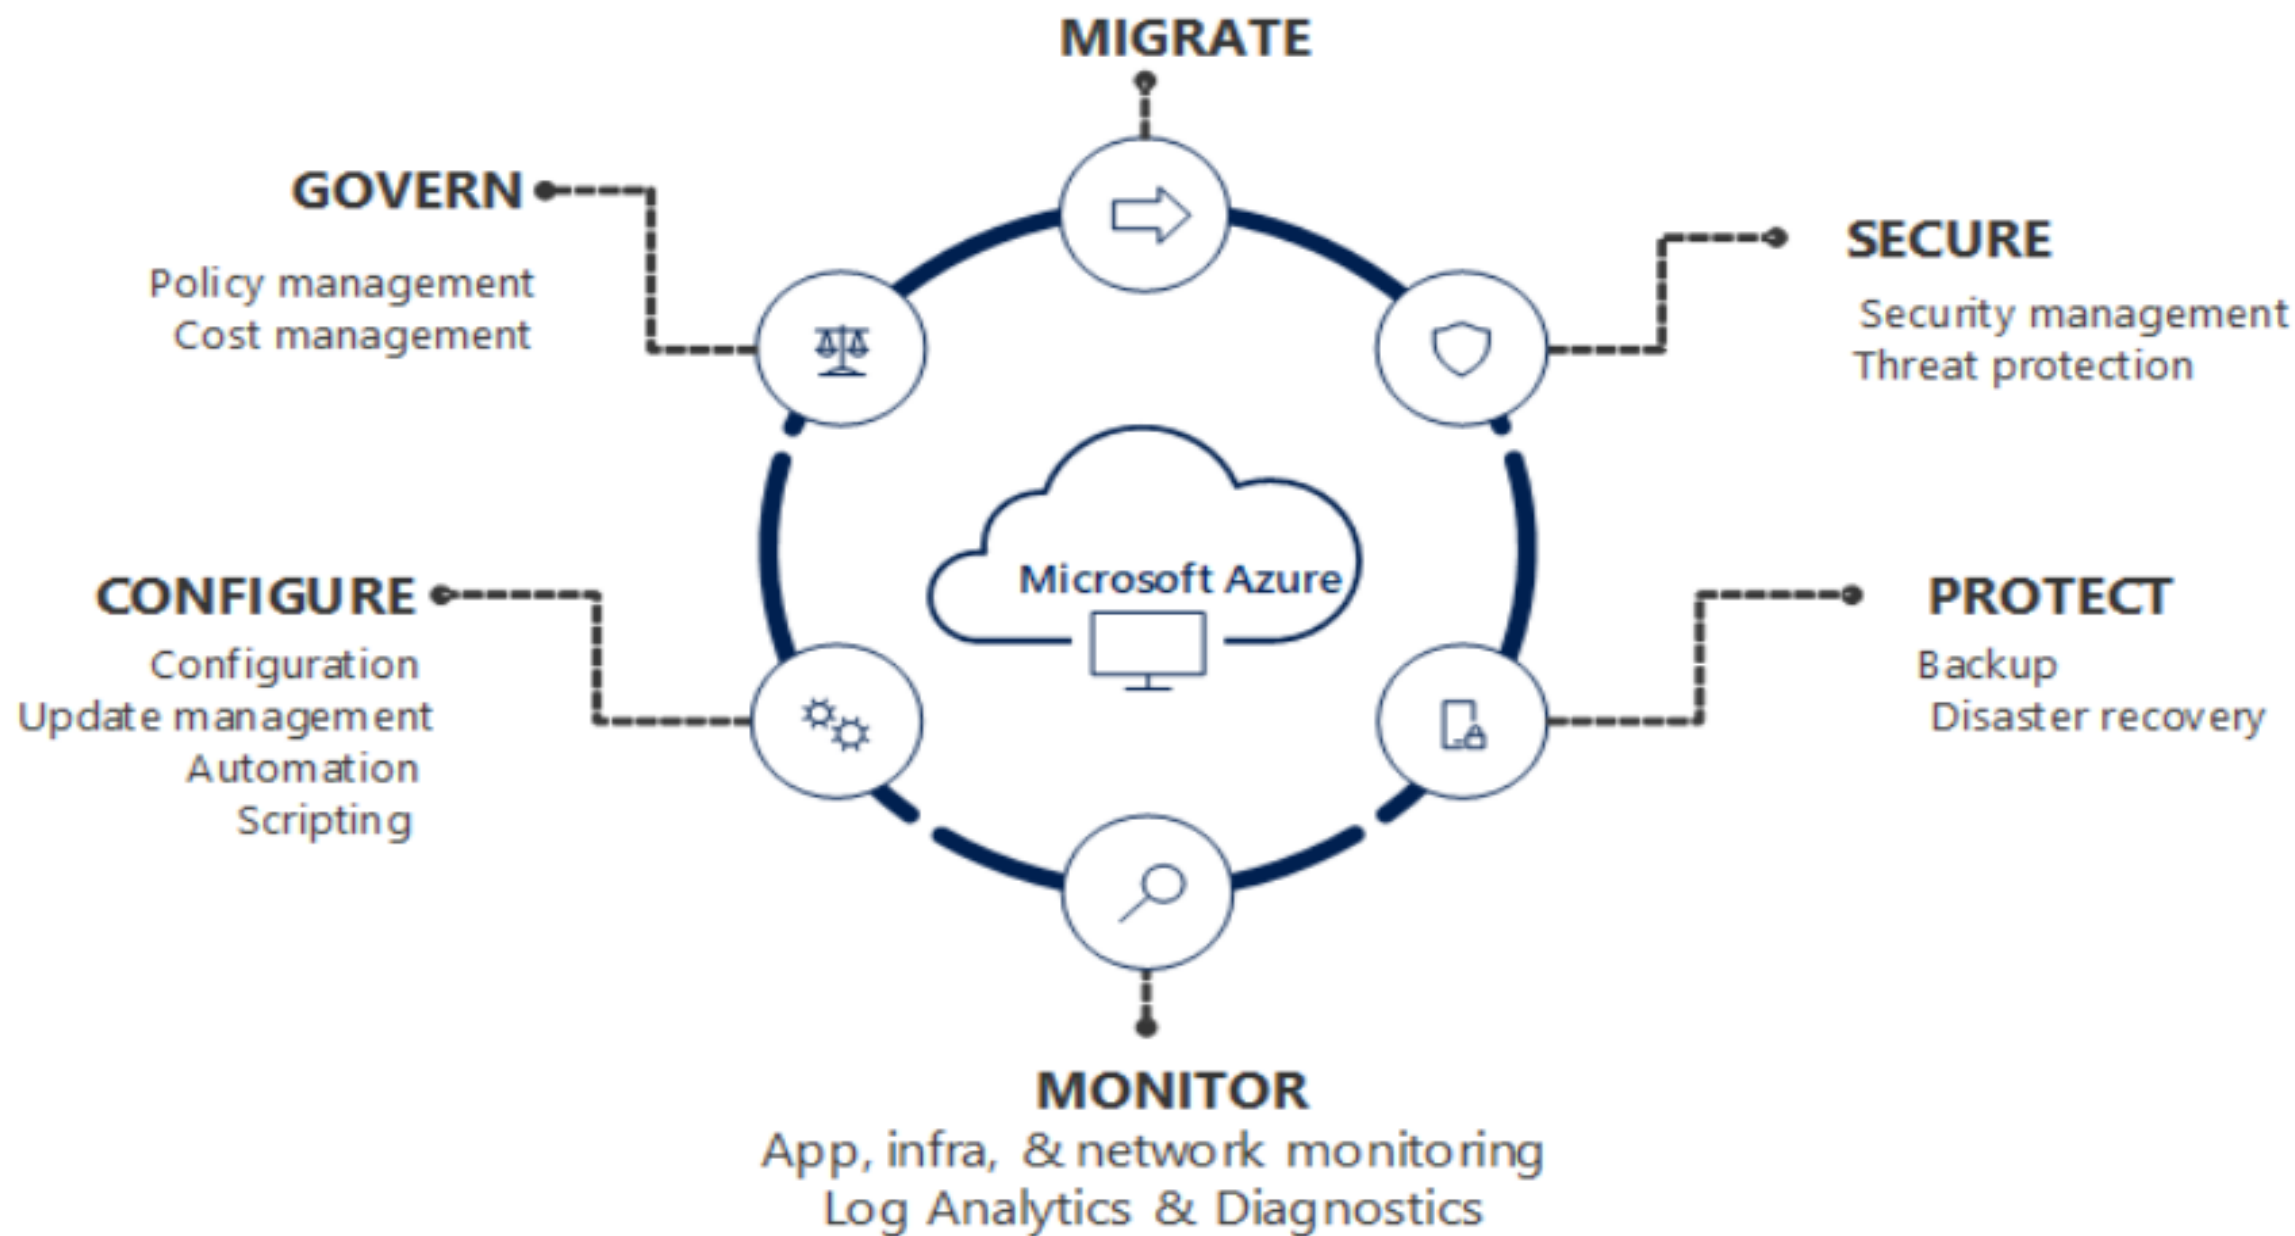

Module 2:

Implement Process for Routing System Feedback to Development Teams

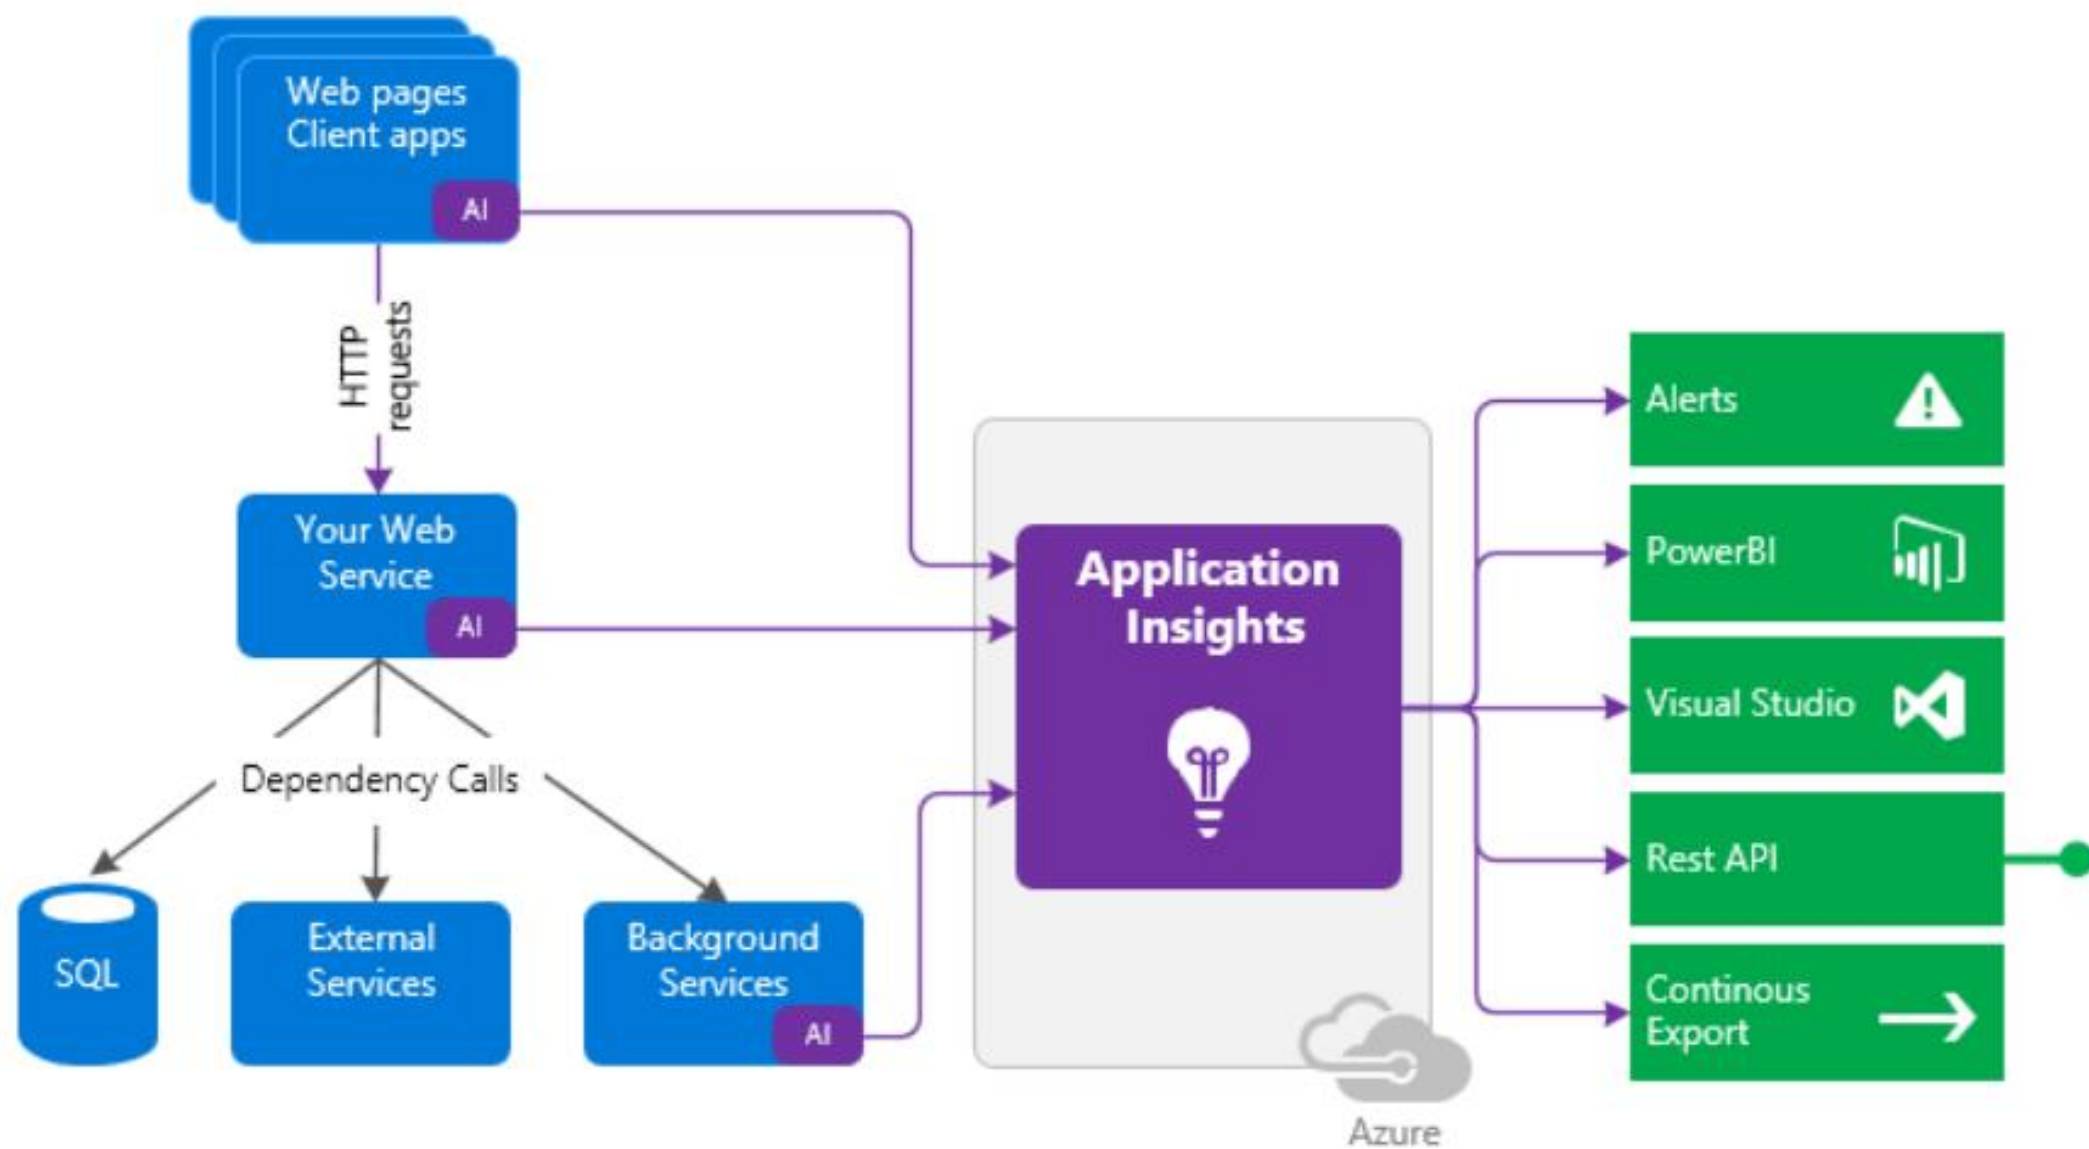

Lesson 01: Implement Tools to Track System Usage, Feature Usage, and Flow

Introduction to Application Insights

How do I use application insights

Lesson 02: Implement Routing for Mobile Application Crash Report Data

App Center Diagnostics

- App Center Diagnostics is a cloud service that helps developers monitor the health of an application, delivering the data needed to understand what happens when an app fails during testing or in the wild.
- In the App Center Diagnostics UI, you can attach, view and download one binary and one test attachment to your crash reports.
- Track events leading up to a crash to capture useful information about the state of your app.

Configure alerts

1. Log into App Center and select your app.
2. In the left menu, navigate to Settings.
3. Click on Email notifications.
4. Select the box next to crashes.
